TECH STACK

FRONTEND

Next.js · TypeScript · JavaScript
React · Tailwind CSS · Storybook
Zustand · SSR

BACKEND & INFRA

Node.js · NestJS · PostgreSQL
REST APIs · Git · AWS
CI/CD · GitHub Actions

AI TOOLING

Claude Code · Codex · Cursor
ChatGPT · Gemini CLI
MagicPath · Figma AI
OpenClaw · Hermes

SOFT SKILLS

Leadership
Adaptability
Communication
Scrum & Kanban

LANGUAGES

Spanish · Native

English · Bilingual

Portuguese · Intermediate

ABOUT

Product-oriented software engineer with 7+ years of experience building AI-powered products, scalable frontend systems, and end-to-end user experiences across startups and fast-moving teams. Specializes in turning ambiguous product ideas into polished, production-ready software — combining frontend engineering with systems thinking, UX sensitivity, and rapid iteration.

EXPERIENCE

Senior Software Engineer

Blaze · Brazil, Remote | Jan 2024 – Present

- Develop and maintain production software solutions, focusing on scalability, reliability, and long-term maintainability.
- Design and implement new product features, API integrations, and improvements to existing systems.
- Collaborate with cross-functional teams to translate business requirements into effective technical solutions.
- Contribute to architectural decisions, code quality, and engineering best practices; troubleshoot complex issues and improve system performance and development workflows.

Senior Software Engineer

Nearsure · US, Remote | Nov 2022 – Jan 2024

- Contributed to a large-scale AI-powered conversational platform within a distributed frontend team, building reusable, scalable UI components with React, Next.js, Storybook and Radix UI.
- Implemented graph-based visualizations with React Flow for complex conversational workflows, using Tailwind CSS and MobX for responsive, performant product experiences.
- Led frontend development of a production React Native app for a major US clinical research organization, designing a scalable architecture with Expo, Zustand and React Native Paper.
- Took ownership of frontend engineering decisions and coordinated a distributed, cross-functional team, aligning implementation with business requirements and emphasizing code quality and a reliable mobile experience.

Software Engineer

VAIRIX · Montevideo, Remote | Jul 2021 – Nov 2022

- Led technical architecture and development of a web-based gaming platform, from initial planning through its public release in November 2022.
- Defined application structure, selected technologies, and established development patterns to support long-term maintainability.
- Coordinated engineering tasks, provided technical guidance, and mentored developers throughout the project lifecycle.

Full Stack Engineer

Globant | Jan 2019 – Jul 2021

- Contributed to a machine learning platform focused on continuous delivery and software automation.
- Developed frontend features and reusable UI components for complex technical workflows, and implemented backend API integrations to enable seamless data exchange across services.

SELECTED PROJECTS

AI Agent Automation System

Designed and built a personal AI agent system for task orchestration. Implemented conversational command interfaces, multi-step automated workflows, and integrated multiple AI APIs to accelerate development processes.

Word Search Book Generator

Automated content generation system producing print-ready word search books — dynamic layout algorithms, PDF generation pipelines, and configurable word-placement logic in TypeScript.

EDUCATION

Systems Engineering

Universidad Tecnológica Nacional | 2013 – 2018
